Education

Banaras Hindu University

Master of Computer Applications - 8.53 CGPA

Sept 2022 – May 2024

Banaras Hindu University

Bachelor's in Computer Science - 8.73 CPA

Sept 2019 – May 2022

Experience

Software Engineer

Datafoundry.ai

Bengaluru, India

Oct 2024 – Present

- Led the development of UI for 3 critical client facing projects, along with presenting the applications to the stakeholders which led to the **on-boarding of 2 new clients**
- Built a **semantic search application** to identify related trials and articles and developed an automated case intake UI to process and export data from regulatory forms into XML formats.
- Integrated Single Sign On across all applications reducing the **user on-boarding time by 50%** and also **reduced database reads by 6%**.
- Created **interactive data visualizations** for clinical trials, adverse event tracking, devices, enabling data-driven decision-making and actionable insights for stakeholders.
- Improved code quality by **reducing duplicate code below 1%** and **increased code coverage by 20%**.

Software Engineer Intern

Yudoeo Solutions @ DyLIt

Remote, USA

Mar 2024 – Sep 2024

- Collaborated on the reimplementing of the original platform using Next.js and Go, **improving performance by more than 30%**.
- Implemented real-time notification and messaging systems using **WebSockets** to ensure instant communication and seamless user interactions
- Led the implementation of Localization of the application in **6 different languages**.

Projects

Semantik.ai :: ReactTS, FastAPI, Weaviate.io, Docker

- Engineered a semantic search application using **Weaviate.io** as the vector database, scaling it to **10k medical articles** and deployed it using ReactJS and FastAPI.
- Integrated it to a quantized Gemma2b model to allow user to find the relevant articles using human language leading to faster and easier inference.

CaseIntake.ai :: ReactTS, Zustand, TailwindCSS, PDF.js, Websockets

- Pioneered the development of the user interface of the Automated Case Intake application to extract case data from medical forms, integrating **file upload** and asynchronous processing using **Websockets**.
- Ensured seamless integration of **PDF and Docx rendering** in the application using **PDFjs** and used **WebSpeech API** to read the articles.

Technologies

Languages: JavaScript, TypeScript, Python, Java, HTML, CSS

Technologies: NextJS, ReactJS, Redux, Jest, Websockets, Vector Databases, Micro-frontend, RTK, SCSS

Achievements

- **Top 30** in the national level data science for engineers exam conducted by NPTEL under the SWAYAM Initiative with more than **3000** participants.
- **Top 50** in Internet of Things national level exam conducted by NPTEL under SWAYAM initiative with over **25000** participants nationwide.
